"Seniors & Boomers: How to Treat the Most Medically Complex Generations"... 8:30 - 11:30 - 3 CEUs...Does it seem like your patient population is getting older? Are many taking multiple medications? Currently, 43 million people are over the age of 65, and the number is growing daily. It is estimated 3 in 4 in this age group suffer from 2 or more chronic diseases such as heart disease, diabetes, or COPD. Many are cancer survivors. Others will have experienced joint replacement. This course will empower you to feel confident treating those that are medically compromised or complex, experience polypharmacy, or have some type of disability.

"That's Not What I Learned in School: What Successful Practitioners Do Differently"...1:00-4:00 - 3 CEUs...Did you learn that floss is the magic elixir preventing everything from caries to bone loss? Or perhaps you are still providing 'routine care'--such as prophys, fluoride treatments, and radiographs. While education provides the foundation, it depreciates over time as new research, therapies, and treatments emerge. This course will empower you to move out of your comfort zone and feel confident adopting new evidence-based strategies for everyday patient care.
