**A Little of This and a Little of That!
Today's Dental Products & Treatment**
&

It's all about Saving Lives!

Organ Transplantation, Donation and Recipient Care

with Tricia Osuna, RDH, BSDH, FAADH

Friday, September 8, 2017 -9:00 - 4:00

**Hilton College Station & Conference Center 801 University Drive East
College Station, TX 77840**

Tricia Osuna, RDH, BSDH, FAADH (Friday, September 8, 2017 6 CEUs)... Tricia Osuna is a University of Southern California graduate, Past President and Fellow of the American Academy of Dental Hygiene and Past President of the California

Dental Hygienists' Association. Tricia has over 38 years of experience as a dental hygienist to share with her audiences in a humorous and enlightening presentation experience.

She is an enthusiastic lifelong CDHA and ADHA member and a previous Member of the Dental Board of California. She is a Founding Member of the American Board of Facial Esthetics.

Recognized for her many efforts and contributions to the Dental Hygiene profession, Tricia has received several awards including the CDHA's *President's Recognition Award*, the ADHA *Bausch and Lomb "Distinctions in Dental Hygiene"* Award and most recently the 2015 American Dental Hygienists' Association *Distinguished Service Award*.

Licensed in both California and New York, her experiences traverse the dental hygiene arena in a very unique way spanning a variety of roles including Consultant, Clinician, Educator, International Presenter, Author, Mentor as well as business owner.

A Little of This and a Little of That!:Today's Dental Products and Treatment Options (Friday, 9:00 - 12:00) Today's dental sessions require an exhaustive knowledge of products, instruments and equipment. Our profession has changed and grown to a new level which offers us continuous challenges to recognize the new advances in technology and their use in dentistry. As professionals providing health services, we should be at the pulse of clinical devices and treatment, while being able to recommend product protocols for use in the office. The process of care (assessment, diagnosis, treatment planning, implementation and evaluation) requires us to understand what these products are, how to use them, contemporary treatment options, how to implement the procedures and evaluate what is and what is not working for us as individuals and as clinicians. We will also discuss ergonomic options to protect ourselves as clinicians.

This course will provide information for the clinicians to be able to:

- Recognize improvements on products utilized by dental professionals
- Distinguish which new-to-market products should be brought into your practice
- Select materials and products for dental hygiene therapy, oral cancer screening, patient communication and instrumentation
- Discuss diagnosis assistance with employers and rationale for changes in assessment forms and diagnostic tools
- Communicate effectively to patients and assist in the business of the dental practice
- Recognize and evaluate changes to implement in the office
- Discuss strategies that incorporate efficiency in patient treatment for a more productive schedule

It's all about Saving Lives! Organ transplantation, donation and recipient care (Friday, 1:00 – 4:00) As dental professionals, as well as part of society, we are all able do something to help the thousands of individuals in need of our care. As a specific set of healthcare providers treating this unique group of transplant recipients we need to understand and discuss their options and oral hygiene needs. Organ transplantation and donation has increased tremendously over the last 10 years yet there is still an immense need for understanding the processes of donation, transplantation and recipient care.

Participate in a sharing of organ transplantation and donation information; learn about transplant recipients and their need for specialized dental care. This presentation will offer insight about the 'how to's' of not only dental care for organ recipients but also communication with their families. We will also share insight on how to be a donor; understand that process and how to aid in sharing the message with your patients and colleagues on how to ~ Save Lives!

Sharing life's experiences is a fabulous way to learn!

Course Objectives:

- Understand the process of transplantation
- Discuss patient's dental needs based on medications and oral complications
- Recognize the need for specialized care for transplant recipients
- Appreciate and understand organ donation processes
- Communicate with patients and family to share the need for registration

Thanks to these sponsors for their educational grants for today's courses:

Q-Optics Philips Voco Curaprox DenMat Cetylite
