Angel Oaks Event Center

314 A Pruitt Rd., Spring, TX 77380

281-367-3200

Tricia Osuna, RDH, BSDH, FAADH (Friday, February 7, 2020 6 CEUs)

Tricia is a University of Southern California graduate, Past President of the American Academy of Dental Hygiene and California Dental Hygienists' Association. Tricia is in her 41st year as a dental hygienist, with many of those years as a clinician, and shares this with her audiences in a humorous and enlightening presentation experience. Ms. Osuna is a lifelong CDHA/ ADHA member and a previous Member of the Dental Board of California. She is a Founding Member of the American Board of Facial Esthetics. Licensed in both California and New York, her experiences traverse the dental hygiene arena in a unique way spanning a variety of roles including Consultant, Clinician, Educator, International Presenter, Author, Mentor as well as owner of Professional Insights, Inc

An author, clinician, educator, consultant, international presenter, mentor and business owner her passion for dental hygiene radiates in her presentations!

“CHANGE YOUR THOUGHTS TO IMPROVE YOUR OUTCOMES” An Update on Protocols, Products and Treatment Options” (Friday, 9:00 – 12:00) Updated protocols assist us in determining our patient’s specific needs. As we move towards a more collaborative profession, we need to embrace these updates to identify those needs. We are presented with continuous challenges of new advances in products and technology and their use in dentistry and are in need information to determine when and how to add them into our armamentaria. As professionals providing health services, our perception of product use along with protocols needs to be discussed with our team as well as the interdisciplinary referrals we have. The process of care (assessment, diagnosis, treatment planning, implementation, evaluation and documentation) requires a comprehension of protocols, products and treatment options and how they are to be utilized.

This course will provide information for the clinicians to be able to:

- Modify diagnosis assistance with the team and rationale for changes in assessment forms and diagnostic tools
- Distinguish which new-to-market products should be brought into your practice

- Integrate materials and products for a variety of uses in the dental office from infection control, dental hygiene therapy, oral cancer screening, patient communication and instrumentation
- Develop effective communication with patients and assist in the business of the dental practice
- Formulate strategies that incorporate efficiency in patient treatment for more productive scheduling

“It’s All About Saving Lives! Organ Transplantation, Donation and Recipient Care” (Friday, 1:00 – 4:00)

As dental professionals, as well as part of society, we are all able do something to help the thousands of individuals in need of our care. As a specific set of healthcare providers treating this unique group of transplant recipients we need to understand and discuss their options and oral hygiene needs. Organ transplantation and donation has increased tremendously over the last 10 years yet there is still an immense need for understanding the processes of donation, transplantation and recipient care.

Participate in a sharing of organ transplantation and donation information; learn about transplant recipients and their need for specialized dental care. This presentation will offer insight about the ‘how to’s’ of not only dental care for organ recipients but also communication with their families. We will also share insight on how to be a donor; understand that process and how to aid in sharing the Formulate strategies that incorporate efficiency in patient treatment for more productive scheduling message with your patients and colleagues on how to ~ Save Lives!

Sharing life’s experiences is a fabulous way to learn!

Course Objectives:

- Understand the process of transplantation
- Discuss patient’s dental needs based on medications and oral complications
- Recognize the need for specialized care for transplant recipients
- Appreciate and understand organ donation processes
- Communicate with patients and family to share the need for donor registration
